Video- DVD

Quality Educational Videos on a variety of subjects. We are dedicated to bringing you outstanding instructional videos on all kinds of art and craft topics by leading artist and craftsman educators. In the future we will be adding new titles as we acquire them.

Blacksmth Primer

A Course in Basic and Intermediate Blacksmithing

Item	Size	Description	Price
Primer_DVD			**$129.99**

This is the companion video to "A Blacksmithing Primer". The author, Randy McDaniel, of this indispensable reference book appears in these videos, teaching the standard techniques that all blacksmiths must know to master the craft. This is a must-have for every blacksmith's video library! You will learn how to organize your shop, build your first fire, hold and use your hammer, choose your stock, make tools for any job, forge weld, make scrolls, hinges, how to make animal and human heads and much, much more. Randy's simple, straightforward and humorous approach to learning to be a good blacksmith is as much a part of these videos as it is in his book. Shot and edited in the same clear, user-friendly style you have come to expect from Love of Art Productions, you will enjoy watching Randy demonstrate all the techniques close-up, just for you. This is a three tape/ DVD set, with almost 6 hrs of learning. You won't find a better resource for the beginning and intermediate blacksmith. We also have the companion book so you can watch the videos then take the book to the shop!

Bugs and Birds

A must-have for the hobbyist or professional! Running time 37 min

Item	Size	Description	Price
DVD-Bugs	DVD		**$32.95**

Continuing in the vein of its companion video, Leaves and Flowers, this tape demonstrates some insect and bird motifs that can be used and adapted for whimsical decorative work and garden-themed pieces. Epps is shown creating critters such as a scorpion, a garden snail and a dragonfly, as well as a hummingbird and two types of swans. These projects range from the extremely simple to the complex , and offer a quick way to add lots of ornamental appeal to a decorative project. Some of these items are used by the artist at demos as quick crowd-pleasers as well, taking only two or three heats to complete. A brief “chalkboard” segment enhances the viewer's learning opportunity by outlining the steps in creating each item, and enhanced video and sound make Epps’ instructions clear and easy to follow.

This tape is the first in a series featuring Mesquite, Texas blacksmith, Bill Epps

Item	Size	Description	Price
DVD-Animal	DVD		**$32.95**

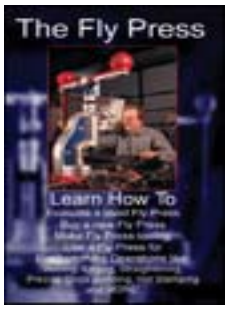
A nice introductory collage of images, underscored by folk music and a quote form Longfellow’s “The Blacksmith”, gives the viewer a clue that these videos are going to be different from most of what’s out there on the how-to market. In this video the viewer learns the steps in creating several novelty animal heads out of square stock and a novelty horse out of a horseshoe (Epps began his career as a farrier). The artist also discusses ideas on applications for the items shown. A “chalkboard’ segment introduces each item, breaking down the process of creating the heads and showing how the shape of the steel should change in each step. Epps includes tips on technique, including a discussion of the molecular structure of steel and why a smith makes his steel “square, then round”, and how to use a cross-peen hammer correctly. Forge-welding can be clearly seen in the making of one of the pieces, and Epps gives tips to the beginning blacksmith on how to get a good forge weld.

The Fly Press

The fly press is becoming an increasingly popluar tool for the blacksmith

Item	Size	Description	Price
Fly-DVD	DVD		**$36.95**

In "The Fly Press", you will learn to evaluate used fly presses, what to look for in a new press, how to make tooling, and much more. John also demonstrates many common blacksmith operations on the fly press such as making tenons, veining, straightening stock, bending precise circles and hot stamping. All of these techniques are shown to you in the exceptional way that Love of Art Productions has come to be known for clear, up close, and easily understood video instruction. John Crouchet says, "If you're working cold you may be making money!" What a novel idea!



Making Tongs

Running Time 32 Min

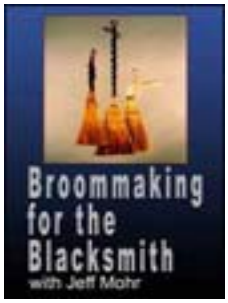
Item	Size	Description	Price
DVD-Tongs	DVD		**$32.95**

Making Tongs shows the blacksmith making three different styles of tong joints with three different tong heads. First we see the Twisted Joint, Scrolling Head tong, then the Traditional Joint, Wolf-jaw tong and finally the Champion Joint /Bolt Head tong. Epps also shows a variety of other specialty tongs he has made, and discusses the importance of a blacksmith being able to make his own tools. Tips such as how to quench moving parts will help the student blacksmith avoid frustrating mistakes in his own shop. The viewer sees the artist using a power hammer in this video to draw out tool handles, as well. As in the first video, Forged Animal Heads, the directors use careful editing, good voice-over enhancement and a chalkboard segment before every piece demonstrated, to help the viewer duplicate Epps techniques.

Broom Making For the Blacksmith

Item	Size	Description	Price
DVD-Broom	DVD		**$24.95**

Jeff began his career in the arts and crafts business in 1976. Jeff apprenticed traditional broom making from a Carolina craftsman for a period of one year. He learned the different styles of tying brooms and creating unique wooden handles. In 1981, Jeff took up a hammer and began blacksmithing. He does interior and exterior architectural iron. In this tape Mr. Mohr shows us how to tie broom straw on to forged handles



Video- DVD

Free Form Forging with Uri Hofi

Item	Size	Description	Price
DVD-hofipower	DVD		**$39.95**

Uri starts with a very brief statement about himself and then immediatelly gets to work. The stock necessary and the forging methods are explained before the forging of each piece.

The Hofi system teaches the forging of elements that can be used as parts of a larger project. Learning a few elements immediatelly makes the new smith productive. With an arsenal of elements learned over time the smith can create beautiful works quickly and easily.

Right, Uri explaining the steps to make an element from the 5/8" piece of stock he is holding. Depending on the element the raw stock, the finished work and how the work is handled on the dies is shown.

Forging Solutions : Power Hammer Techniques Vol. 1 with Amit Har-lev

Item	Size	Description	Price
DVD-Forging Sol	DVD		**$39.00**

In this video Amit introduces himself and gets to work right away.

This video covers power hammer basics using good combination dies and auxiliary crown dies. There are 30 chapters. The techniques shown ARE basic but cannot be performed on hammers with sharp undressed dies or badly shaped combo dies.

Among the techniques demonstrated are drawing, shouldering, heading and many examples of texturing

Leaves and Flowers

The professional or hobbyist blacksmith will want to add these techniques to his or her repertoire.

Running Time 52mins.

Item	Size	Description	Price
DVD-Leaves	DVD		**$39.95**

Third in a series, this video features Bill Epps, a Mesquite, Texas blacksmith, demonstrating some of the techniques for making flower and leaf motifs for decorative projects. There are 5 leaves and 5 flowers demonstrated, including several ways of cutting veins into a leaf, folding and shaping the leaf form, and specific blossoms such as a rose, a morning glory, a dogwood blossom and a calla lily. Epps shows how to achieve surface texturing on leaves and petals to give a more naturalistic finish to the product, and discusses the merits of giving just the inference of a specific species, rather than trying for exact replication. The use of the guillotine tool, or top/bottom fuller, is shown. Applications for the individual items shown are discussed, and the viewer is encouraged to find his or her own ways of using these beautiful decorative details. Skilled photography and editing, and a working knowledge of the subject matter are evident in this video, as in all the others by Love of Art Productions

Video- DVD

Basic Damascus Patterns
Featuring Mike Norris

Renowned knife maker Mike Norris leads the viewer through the important steps of forming basic Damascus patterns in preparing and forging the billet

Item	Size	Description	Price
DVD-Basic Damascus Patterns	DVD		**$39.00**

Steps include:
Flux less Weld
Power Hammer and Press welding/forming.
Hydraulic Press with Textured Dies
Rolling Mill
Grinding

Part two of a three part series.

Item	Size	Description	Price
75 minutes, DVD only. DVD-Power repousse # 2	DVD		**$39.00**

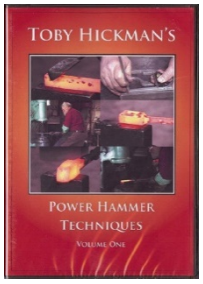
Repousse'
Featuring Andrew Chapman

Techniques using forms to create designs in a negative space. Forming copper and steel to make large repousse' wall decorations in the metals studio. Sun/Earth form and the Oakhill Ironworks copper leaf logo.

Part one of a three part series

Item	Size	Description	Price
DVD-Repousse' Part 1	DVD		**$39.00**

Toby Hickman's Power Hammer Techniques



In this DVD Toby shows and describes how to make a pair of box jaw tongs which he will forge using his Striker 88# Air Hammer. To make the tongs several techniques and skills will be shown. These include: the hit turn technique; forging to dimension using stops; and the use of hand held tools under the power hammer dies. The tool needed to make the tongs will also be forged and its layout shown. At the end of the DVD is a section where the math is clearly explained which is necessary to calculate the amount of steel needed to forge the tongs from any stock size of 4140 of sufficient mass. One hour run time.

Item	Size	Description	Price
DVD-Toby Hickman	**DVD**		**$42.00**

Coal Forges

All the forges are imported from Germany. Angele is the Leading Blacksmith Supplier in Europe and we stock the whole range of products for blacksmithing and metal design

Hand Crank Forge

Item	Size	Description	Price
116020			**$899.00**

Belt Grinders

We offer 84 Engineering 2x48 and 2x72 Grinders

2X48 Grinder 84 Engineering Alec Steel Model

Item	Size	Description	Price
SM-48-Complete	115LB		$1685.00
SM-48-Frame Only	40LB		$759.00

Tech Specs:

· 2x48" belt length
· 4" drive wheel
· 56C Frame
· 6" long platen backing
· 360° rotating platen allows use of: flat platen, slack belt, 2" and 3" contact wheels
· Rubber coated wheels for smooth performance and great belt traction
· Flat plane belt tracking for accurate belt alignment
· Fully welded frame
· 3 arm slots
· Includes fixed work rest
· Platen arm also accepts small wheels attachments.
• Flips from vertical to horizontal with optional bench stand
· Made in Australia by 84 Engineering

2X72 Grinder 84 Engineering Alec Steel Model

Item	Size	Description	Price
SM-48-Complete	115LB		$1895.00
SM-48-Frame Only	40LB		$1095.00

This grinder comes with a 5" Contact Wheel for 2 slack grinding tension options.

•2×72" belt length
• Shipped flat packed, requiring some basic bolting for assembly
• 8.5? / 215mm platen backing
• 360° Rotating platen allows: use of platen backing, slack belt, 2" contact wheel, 3" contact wheel and is able to accept our optional 5? contact wheel without removing the platen.
• Rubber coated wheels for smooth performance and great belt traction
• Flat plane belt tracking for accurate belt alignment
• 56C Frame
• Unpainted for greater economy (or greater customization)
• 2 tooling arm slots
• Fixed work rest
• Protective spark guard
• Flips from vertical to horizontal with optional bench stand
• Made in Australia

This unit requires assembly - NO WELDING REQURED! Just nut and bolts

Texture Tools

Off Center brand texturing and forging hand tools for use on the power hammer, fly press or anvil. Made in the USA. Forged using diemakers dies means you get 1st generation output instead of the standard homemade third generation. The depth and clarity of any texture is dependent on process used in creating it.
See note on spring swages for further information on the need for not using mild steel for dies. Forged from 4140 with a unique heat treating process means it lasts longer too!

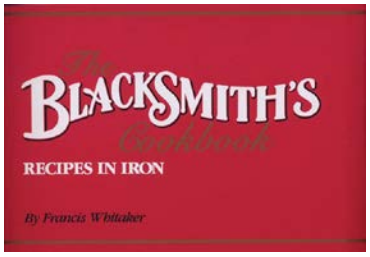
Backyard Blacksmith – Lorelei Sims

184 pages and 250 Illustrations

Item	Size	Description	Price
Book Backyard	8 ½ X11		**$20.00**

Traditional Techniques for the Modern Smith

The Backyard Blacksmith shows you how - with some patience and a working knowledge of metals, basic tools, and techniques - blacksmithing can be easy to learn and a rewarding hobby. Detailed step-by-step full-color exercises teach all the universal skills and techniques used to forge iron; like having a master blacksmith by your side. It provides the reader with an understanding of the properties and characteristics of forging hot metal, making the craft accessible to those without previous experience. More than 20 detailed, beautiful and functional step-by-step projects organized by difficulty level including all the techniques needed to succeed. Try it!



Blacksmith's Cookbook Recipes In Iron – Francis Whitaker

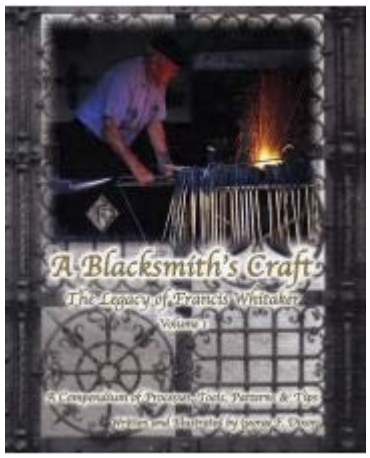
153 pages and 144 Illustrations

Item	Size	Description	Price
Book cookbook	6 X 9 1/2		**$40.00**

Quick Overview

NEW reprint with index!

This book is the result of ten years of workshops, demonstrations and master classes. The idea of the title for 'The Blacksmith's Cookbook' was to give credit to blacksmith's wives, especially my own. There is a similarity between forges and kitchens, basic equipment, basic tools and the often exquisite results. A large part of my success is due to the devoted help of my wife, and I am sure this applies to many other smiths. F.W.



A Blacksmith's Craft – George Dixon

153 pages and 144 Illustrations

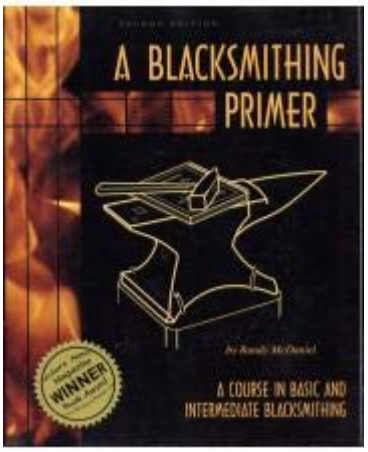
Item	Size	Description	Price
Book ABC	8 X 10		**$40.00**

The Legacy of Francis Whitaker: Vol I

This is a compendium for blacksmiths at any level to preserve techniques and processes essential for the mastery of all levels of traditional blacksmithing. The beautiful illustrations and clearly demonstrated techniques make this the book to become the standard by which all others will be measured

Books

A Blacksmith Primer – Randy McDaniel



184 pages and 400+ Illustrations

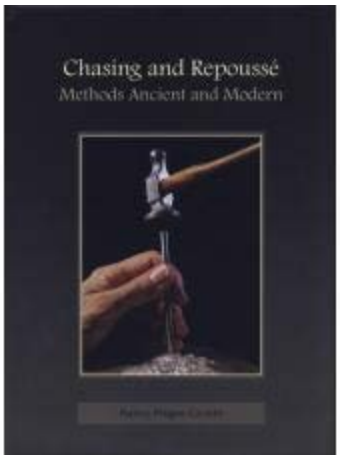
Item	Size	Description	Price
Book Primer	8 X10		**$25.00**

Quick Overview

A Course in Basic & Intermediate Blacksmithing, 2nd Edition

The smith has probably done more to change the world than any other craft. The blacksmith contributed to the settling of this New World by making and repairing weapons, tools, hardware, and all forms of devices for transportation. Eventually this led to assisting in our independence from other countries. This is a long term reference manual and fine blacksmithing companion. It is an excellent resource for advancing your knowledge and skills in blacksmithing. This step-by-step text includes over 400 detailed drawings and illustrations to help increase comprehension levels and more than 20 projects provide opportunities to put these skills to use

Chasing and Repousse' – Nancy Megan Corwin



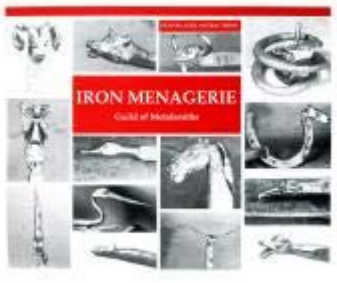
183 pages and 450 Illustrations

Item	Size	Description	Price
Book Chasing	8 1/4X 11		**$40.00**

Quick Overview

Chasing and Repoussé have been used for centuries to embellish metal objects. This long awaited book provides lucid and practical instruction that will appeal to beginners and advanced craftspeople. With more than 450 photos and illustrations, including studio process and diverse master works collected from artists around the world, ***Chasing and Repoussé*** elegantly fills a need in the literature of metalsmithing.

Iron Menagerie – Guild Of Metalsmiths

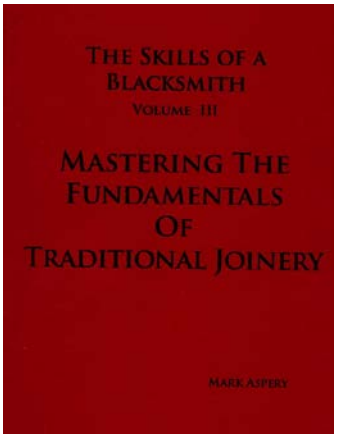


34 pages and 179 Illustrations

Item	Size	Description	Price
Book Menagerie	11 1/2 X 8 3/4		Out of Print

Quick Overview

This book explains how to forge fifteen different animal heads. Blacksmith Paul Hubler hammered out all the projects in this book and explains every step in forging animal heads. *Iron Menagerie* clearly demonstrates every step in the animal head making process so any person with a minimal amount of experience can easily follow the instructions. It was written to fill a need for developing blacksmithing skills in creating decorative fantasy animal heads.



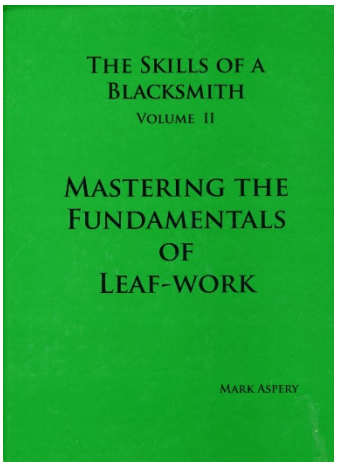
The Skills of A Blacksmith Vol III – Mark Aspery

368 pages and 1600 Illustrations

Item	Size	Description	Price
Book Skills Joinery	8 ½ X11		**$59.00**

Quick Overview

Mastering the fundamentals of Traditional Joinery by Mark Aspery guides the blacksmith in developing the technical skills and understanding required for forging traditional joints. Mark Aspery's concise step-by-step descriptions complement over 1,600 crisp photographs that take the smith from developing the tooling through to the completed joinery project.



The Skills of A Blacksmith Vol II – Mark Aspery

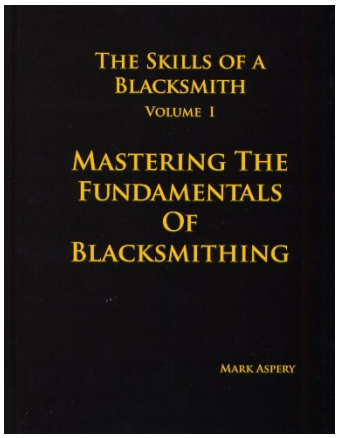
300 pages and 1144 Illustrations

Item	Size	Description	Price
Book Skills Leaf Work	8 ½ X11		**$59.00**

Quick Overview

Mastering the Fundamentals of Leaf Work VOL II

Very clear, step-by-step instructions on the forging of leaves including the related tooling needed. The most complete leaf book ever!



The Skills of A Blacksmith Vol I – Mark Aspery

300 pages and 1118 Illustrations

Item	Size	Description	Price
Book Skills Fundamental	8 ½ X11		**$59.00**

Quick Overview

Mastering the Fundamentals of Blacksmithing Vol. I

An excellent presentation of the technical aspects of blacksmithing as well as the basic fundamentals. Physics and chemistry are translated into an easy to understand language

Flux

Iron Mountain Flux

A widely popular general use flux developed for welding steel efficiently.

Item	Size	Description	Price
Black Mountain	1lb	With Filings	**$30.00**
White Mountain	1lb	No Filings	**$28.00**

Suitable For:

- **Coke Forges**
- **Coal Forges**
- **Propane Forges**
- **Natural Gas Forges**

Flux 1lb Can

Item	Size	Description	Price
EZ	1lb	EZ Weld	$23.00
Stable	1lb	Stable Weld	$23.00
Crescent	1lb	Crescent Weld	$23.00

EZ-Weld Forge Flux (also known as Cherry Heat and Climax) adheres to ferrous metals at relatively low heat and is equally good for lap split butt or jump welding. This flux compound enables the blacksmith to weld tool steel plow open hearth and Bessemer steel at relatively low temperatures making stronger smoother welds. The flux's high percentage of metal (about 40%) facilitates the forge welding process considerably. EZ-Weld forge flux can be used with both iron and steel.

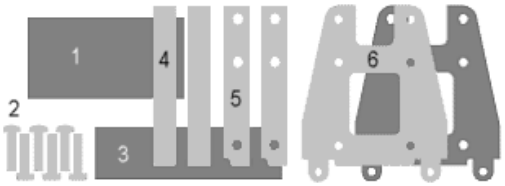
Stableweld Forge Welding Flux has a lower (12%) metal loading than the EZ-Weld Cherry and Climax fluxes. This forge flux is used in forge applications that require a lower metal concentration in the flux. Stableweld functions like EZ-Weld in most forge welding processes and can be used in a wide variety of applications.

Crescent Forge Welding Flux serves as a substitute for Borax on fine work forgings. Crescent Forge flux contains no metal filings and thus cleans easier. It is used in applications such as finishing heats toe caulk and plow work.
Great for parts that need to be finished

Smithin Magician

Introducing a new version of the Blacksmith's Journal classic design in kit form. **The Smithin' Magician III** can be used to fuller grooves & shoulders, draw out accurate square and round tenons, and make square cuts. It's an indispensable tool for any blacksmith shop. Extra cold rolled blanks, precision milled tool steel blanks, and finished die sets are available. You can purchase the Smithin' Magician already assembled or in kit form. It's in our on-line store, under the product line of Smithin Magician.

WWW.BLACKSMITH SUPPLY.COM



Pricing

Assembled $149

Kit $94

Jos F. Bechal, Mostly Metal - BC Canada
"...I am really impressed with the Smithin' Magician. It's handier than I ever dared to hope! I do production runs for a commercial shop and consistency is very important. Thank you for a terrific little gadget. Don't know how I lived so long without it."
